

GRIP Recruitment Software powering placements for GCS

2LS
RECRUITMENT
SOFTWARE SPECIALISTS

key benefits

- Faster response to new vacancies.
- Quicker matching of vacancy and candidate.
- Used by all 80 staff.
- Saves time and money.
- Underpins entire placement process.

the challenge

GCS IT Recruitment, one of the UK's leading IT recruitment consultancies, specialises in highly-competitive contingency placements. With fast response and accurate matching essential to success, its consultants needed a flexible and powerful recruitment software to enhance the way they worked and to give them competitive edge.

the solution

After a meticulous review of the market, GCS opted for GRIP recruitment software from 2LS. GRIP was developed specifically to meet the exacting demands of a recruitment consultancy. It manages and underpins all aspects of the placement process covering clients, candidates and vacancies. Highly-customisable, it matches specific placement processes accurately, enabling staff to collaborate and match the right candidate to the right job, quickly.

the results

All staff at GCS are successfully using the system, from posting and parsing CVs through applicant matching and submission and on to closing placements in the back office. GRIP integrates seamlessly with all popular Microsoft Office products including Outlook and Exchange, improving productivity as well as delivering fast and responsive communications.

GRIP's sophisticated and highly-flexible skills matrix supports powerful searching in GCS's fast-changing placement landscape. In addition, by being able to use multiple open windows and with extensive 'drag-and-drop' functions, staff are able to access and transfer the most up-to-date information quickly and easily.

"GRIP enables us to find the right person and place them more quickly. I've worked with many systems in my recruitment career and GRIP has helped me more than any other. It works in exactly the right way, making us more responsive and able to do what we need to do: find the right person for the right job."
